VISION

The California School Boards Association envisions a state where the public schools are widely recognized as the foundation of a free and democratic society, where local citizen governing boards are fully vested with the means to advance the best interests of students and the public, and where the futures of all children are driven by their aspirations, not bounded by their circumstances.

MISSION

Boards of education are entrusted by their diverse communities to ensure that a high quality education is provided to each student. CSBA promotes success for all students by defining and driving the public education agenda and strengthening school board governance at the district and county levels. To achieve this mission, CSBA will be the leader in providing:

Policy and political leadership on behalf of children and students
CSBA conducts non-partisan research and policy analysis, and advocates aggressively for state and federal policies that are coherent and focused on providing educational opportunities for all students.

Comprehensive support for governance teams
CSBA provides training, support, resources and inspiration to governing boards and superintendents to maximize their effectiveness in carrying out their critical leadership functions.

Direct services to districts and county offices of education
CSBA provides high quality fiscal, policy, executive search and other services to school districts and county offices of education to assist them in meeting the needs of their students.

Education to our communities about public schools and school board leadership
CSBA develops and implements communications strategies that increase the public's understanding about the value of public education and the importance of local school governance.

MISSION & GOALS STATEMENT

What is the core mission of the county superintendents?

California's 58 County Superintendents of Schools and their respective County Offices of Education support the financial and academic soundness of every district and school in the state. County Superintendents strive to ensure that every student in every community achieves and is prepared to learn continuously throughout life, to successfully enter the workforce, and to be active citizens.

The primary aim of County Superintendents is to work collaboratively with school districts to ensure that every student benefits from a quality educational experience, regardless of their circumstances, including students with disabilities, juvenile offenders, students at risk of dropping out or who thrive in alternative classroom settings, or students in high-priority schools.

About CCSESA

The California County Superintendents Educational Services Association (CCSESA) provides the organizational mechanism for the 58 County Superintendents of Schools to design and implement statewide programs to identify and promote quality cost-effective educational practices and services, and provide support to school districts in the areas of student services, curriculum and instructional services, fiscal accountability and business services, and technology and telecommunications. CCSESA advocates on behalf of K-12 and early childhood education at state and federal levels, and in partnership with state agencies, develops and coordinates statewide training to implement new responsibilities of county superintendents to ensure consistent statewide application and standards.

CCSESA's mission

To strengthen the service and leadership capabilities of California's 58 County Superintendents in support of students, schools, districts, and communities.

CCSESA's goals

- Provide enhanced services and resources to districts to support continuous improvement in student achievement with particular focus on closing the achievement gap.

- Advocate for effective policies and adequate resources through involvement in federal and state legislative processes.
- Acting in a preventive, proactive manner to ensure the fiscal solvency of school districts.

What are the responsibilities of the county superintendent?

Student services

County Superintendents provide instructional programs for students with unique needs including special education for severely disabled students, court and community schools for incarcerated and expelled youth, and programs for pregnant or parenting students. In addition, County Superintendents operate career and technical education, migrant education, outdoor education, and child care and child development programs.

Fiscal accountability

Assembly Bill 2756 (Chapter 52, Statutes of 2004) expanded and redefined County Superintendents' fiscal oversight responsibilities. Although school districts are responsible for their own financial records, County Superintendents must review and approve district budgets and ongoing expenditure patterns before they are sent to the California Department of Education. In effect, County Superintendents provide the fiscal safety net for all school districts in the state.

Curriculum and instruction

County Superintendents provide leadership and support to school districts to ensure continuous improvement of curriculum development, classroom instruction, student assessment, teacher preparation, and ongoing professional development to both certificated and classified personnel.

Administrative services

County Superintendents provide various levels of administrative and educational support services to small and mid-sized districts including supervision of instruction, attendance and health services programs, guidance services, library services, training and education of prisoners, financial services, and cost-saving group purchasing programs.

Personnel services

County Superintendents monitor and review school district credential assignment practices to ensure valid credential status for certificated staff. County Superintendents also assist with recruitment, selection, and retention efforts for classified, certificated, and management employees.

Technology and telecommunication services

County Superintendents have established and maintain an integrated voice, video and data link of existing technology networks. County offices of education play in integral role in developing, maintaining, coordinating, and supporting advanced, cost-effective technology delivery systems, services, and curricula that increase learning opportunities for students and expand professional development and information resources to teachers and administrators.

Looking toward the future

The statewide network of the 58 County Superintendents of Schools, created 150 years ago to ensure that every student had access to a free public education through creation of schools and districts, is now focused on effective, high quality, cost-efficient delivery of state and federal programs, initiatives, and services.

Facts & figures

- County Superintendents of Schools are state constitutional officers. In 1849, the position was established in the original California State Constitution as a duty of the county assessor. In 1852, the office of the County Superintendent of Schools was created by statute, and in 1856, it was made elective as a position of county government. In 1879, the revised California State Constitution established the position of County Superintendent of Schools as a constitutional office (Article IX, Section 3).
- Fifty-three of the 58 County Superintendents are elected. In San Diego, Santa Clara, and Sacramento Counties, the County Superintendent is appointed by the County Board of Education. In Los Angeles County, the County Board of Supervisors appoints the County Superintendent. In San Francisco County, the appointed district superintendent is deemed to be the County Superintendent (under the authority of the County Board of Supervisors).
- The County Superintendent and the County Board of Education, although individually elected and separately accountable to the people, are commonly known as the County Office of Education. (For the most part, the roles of the County Superintendent are distinct from the County Board of Education.)
- There are seven single school district counties in California as follows: Alpine, Amador, Del Norte, Mariposa, Plumas, San Francisco, and Sierra Counties.

CCSESA STEERING COMMITTEES

BUSINESS AND ADMINISTRATION STEERING COMMITTEE:

The Business and Administration Steering Committee (BASC), is an organizational unit of CCSESA established to promote business support to local school districts and county offices of education. Business support services are designed to enhance classroom education by providing leadership and expertise to local educational agencies in developing and implementing effective and sound business and management practices that strengthen financial accountability, program operations and administrative support services.

CURRICULUM AND INSTRUCTION STEERING COMMITTEE:

The Curriculum and Instruction Steering Committee (CISC) initiates collaborative leadership with school districts, the CDE, and other partners to ensure programs, practices, and services that support success for all students. The committee identifies statewide curriculum and staff development needs, provides a communication and implementation network for curriculum and professional development activities, and assists the CDE in adopting and implementing instructional materials and developing publications such as curriculum frameworks.

PERSONNEL ADMINISTRATIVE SERVICES STEERING COMMITTEE:

The Personnel Administrative Services Steering Committee (PASSCo) provides support for effective, efficient, and meaningful personnel and employee relations programs for county offices of education and school districts, provides professional development for county personnel administrators and their staffs, facilitates coordination with the CDE and the Commission on Teacher Credentialing, and provides a forum for discussion about personnel and employee relations issues and legislation.

STUDENT PROGRAMS AND SERVICES STEERING COMMITTEE:

The Student Programs and Services Steering Committee (SPSSC) facilitates communication and common understanding across all student services provided by county offices of education to school districts and communities including special education, Regional Occupational Programs/Centers, alternative education programs, migrant education, outdoor science education, and HeadStart/preschool. The committee promotes the development of quality programs and services through assessment, research and dissemination of best practices.

TECHNOLOGY AND TELECOMMUNICATIONS STEERING COMMITTEE:

The Technology and Telecommunications Steering Committee (TTSC) exists to develop, maintain, coordinate and support advanced, cost-effective technology delivery systems, services, curricula and other educational resources by providing statewide leadership, planning, coordination and evaluation in order to equip California's students with the literacy needed to compete in tomorrow's economy.
